

Ethics

Due at the Start of Lab: None

Rationale for Today's Lab Session

All students in this course will participate in research training activities, including designing survey items, collecting pilot data, conducting a naturalistic observation, and proposing an experiment. The Institutional Review Board considers this “non-research” because there is no intent to disseminate (publish) any of these findings. Nonetheless, ethical issues can arise even in these research training activities, meaning that it is important for students to complete an ethics training program, called CITI. The CITI training is also often needed as the first step for students to become more involved with on-campus research, and “CITI Research Ethics Training” is a useful credential to note on CVs when applying for work in academic, clinical, or business settings. Most universities use the CITI website, so all of your certifications remain intact even when you go somewhere else for grad school, med school, work, etc. However, they need to be renewed every few years, and periodically federal regulations also require CITI to add new training modules.

Instructions

- Complete the online CITI training: <https://www.citiprogram.org/>
- Begin by clicking the Register button to create an account
- CITI updates its registration process and available ethics modules periodically, so ask the Lab Instructor or Mike if you're unsure of anything
- On pages 1-6, choose the best options
- On page 7...
 - **Question 1 (Human Subjects Research) = Group 2: Social and Behavioral Research Investigators and Key Personnel**
 - Questions 2- 4 = Not at this time
 - **Question 5 (Conflict of Interest mini-course) = Yes**
 - Question 6 = Leave blank
 - Question 7 = Not at this time
 - Question 8 = Leave blank
- Passing these training modules provides you with the credentials currently required to conduct real research through a research lab on the uptown campus. The downtown campus, other universities, and certain types of research positions require some of the other modules, which is why CITI offers them.
- Complete the Basic Course training modules and pass the quizzes. Not all modules have quizzes. There should be about 17 quizzes for the “Group 2” modules, and about 3 quizzes for the “Conflict of Interest” modules.
- Once finished, click on the “Print Report” links to print .pdf files for both the “Group 2” and “Conflict of Interest” courses.

- Sample copies of Mike’s CITI documents are attached so you can verify that you’re completing the correct courses. Sometimes students have completed other (incorrect) modules for other Tulane classes.
- This may take more than the time allotted for this week’s lab. You will have time to continue working on the CITI training during future lab sessions, if needed.
- **You will hand in your CITI documents with Paper 1 for 10 points.**

If you have already completed CITI training through your previous involvement in research, log in, verify that your modules and quizzes are up-to-date, and print the PDF files documenting your satisfactory completion. The best way to verify whether you’ve completed the correct modules is by comparing yours with Mike’s. Alternatively, you can log in, click on the “Add a Course or Update Learner Groups,” and make sure you have selected “Group 2” for Question 1 and “Yes” for the “Conflict of Interest” mini-course on Question 5. You will hand in your CITI documents with Paper 1 for 10 points.

Dismissal

- Students may be dismissed early by showing their Lab Instructor that they have completed the requested CITI training. Make sure the CITI training modules are correct. Sometimes students have completed alternative modules for other courses.
